THE TRANSFORMATION

BRING BACK THE BLING

2016 FXDB Street Bob®

Ride back in time on this Street Bob® model. Eye-popping Hard Candy Custom™ Cancun Blue Flake paint. Vintage white hand grips, foot pegs, and shifter peg. Nostalgic whitewall tires. Narrow stance. And an old school, “fists in the wind” riding position thanks to the new chrome Fat Chizeled Handlebar.

And because this is still the 21st century, we’ve beefed up performance with Screamin’ Eagle® air cleaner kit and exhaust, as well as Premium Ride Emulsion Shocks in back and Premium Ride Single Cartridge Fork Kit up front – for a ride quality riders in the 1970s could only imagine.

FUNCTION

Cool can be practical. Add an H-D® Detachables™ windshield and luggage rack for your daily commute. Then strip it down for a night on the town. This narrow and nimble ride is perfect for squeezing through traffic.

STYLE

With its bare-bones design and clean lines, the Street Bob® motorcycle is the perfect starting point to create an old-school bobber. The wide whitewall tires and Vintage White hand grips and foot controls complete the transformation.

PERFORMANCE

Hidden behind a nostalgic chrome cover, the Screamin’ Eagle® Stage I Air Cleaner provides increased airflow to boost power, and the Premium Cartridge Forks and Rear Suspension help put that power to the pavement.

C. VENTILATOR QUICK-RELEASE COMPACT WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

Backrests & Racks

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a H-D® Detachables™ sideplate kit and appropriate Docking Hardware to make adding or removing a detachable accessory a simple “slide and click” proposition.

H-D® Rigid Sideplates

Add practical comfort and support for your passenger. Rigid Sideplates supports are the anchor for sissy bar uprights, backrest pads and luggage racks, and hug the rear fender strut for a clean, streamlined look. Manufactured and tested to rigorous Harley-Davidson standards, these sideplates are designed to specific model application for exact fit.

FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT

This Single Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

45400058

Fits '06-later Dyna® models (except FLD, FXDWG and '07-'08 FXDSE).

B. PREMIUM RIDE EMULSION SHOCKS

Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast acting mono-tube nitrogen gas-charged shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large 36mm pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. You get a controlled ride and minimized bottoming harshness transmitted through the frame. The locking threaded adjustment lets you fine tune the spring preload to your current riding conditions – whether a solo run on the back roads or a fully-loaded two-up freeway tour – and urethane bumpers provide a softer feel if the shock bottoms under load. The beautifully-finished shocks feature black-anodized billet top caps and black progressively-wound springs. Kit includes left and right shock and preload adjustment spanner wrench.

Fits '06-later Dyna® models (except FLD and '07-'08 FXDSE).

Foot Controls

DYNA® FOOT CONTROLS

A long stretch to the controls or a "knees-high" cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tail bone, and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Dyna® models can be equipped with the following foot control configurations:

MID-CONTROLS:

Positions the feet below the knee for a sporting riding posture.

FURTHER FORWARD MID-CONTROLS:

Achieves a comfortable foot-down riding position for the taller rider.

REDUCED REACH FORWARD CONTROLS:

Provides a foot-forward boulevard style without straining to reach the controls.

STANDARD FORWARD CONTROLS:

Stretches the legs for a "feet-in-the-wind" laid back profiling posture.

FLOORBOARDS:

Supports the entire foot and places the rider in a comfortable upright position.

It positions the feet up and forward 10.0" from the mid-control position, but 1.0" closer to the rider than the standard position factory forward controls, placing the rider's boot at a comfortable pivot point for improved support and leverage. Available in chrome or gloss black finish, the kit includes left and right footpeg supports, brake and shift lever assemblies, brake and shift linkages and all required hardware.

C. REACH FORWARD CONTROL CONVERSION KIT*

Love the look and riding position you get with forward controls but not comfortable with the long stretch forward? This Forward Control Conversion Kit repositions the Original Equipment footpegs and foot controls up and back by over 1.0", positioning the controls closer to the rider for added comfort and confidence. The reduced reach places the rider's boot at the proper pivot point for improved leverage, while maintaining the "foot-forward" riding profile. This easy-to-install Conversion Kit includes heavy-duty steel mounts and shortened brake rod and reuses Original Equipment control supports and brake and shift levers or can be personalized with your choice of custom lever styles.

This kit repositions the controls 2.0" forward of the stock location, eliminating the "knees-high" riding attitude while maintaining a sporty upright riding posture. The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes chrome left and right footrest brackets, highly polished brake lever and chrome shift lever. Use stock footpegs, brake and shift linkages or, choose from other Dyna collection offerings to complete your look.

50500386

Convert your Dyna® model to touring-oriented footboard-based controls. This position provides additional support by allowing the legs to take some of the rider's weight, while providing the freedom to reposition the feet during the ride. The kit includes left and right footboards with inserts, footboard supports, brake lever, brake and shift linkage, brake pedal pad and all required hardware. Installation reuses Original Equipment shift lever. Customize the look by adding your choice of accessory traditional D-shaped rider footboard inserts and large brake pedal pads.
