C. VENTILATOR COMPACT DETACHABLE WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate, or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect, and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the Detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

You get quick on-and-off convenience and a clean, custom look. No tools are required and the kit includes everything needed to install the windshield. SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

PAMPER YOUR BEHIND

Experience ultimate comfort. Road Zeppelin® Seat Pads are equipped with a unique air bladder system that distributes rider weight across the entire seating surface. By reducing pressure points and providing shock absorption, this pad allows you to ride your cool low profile seat for hundreds of miles. The mesh cover lets air circulate beneath the rider's body, reducing the temperature between the rider and seat. The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

DYNA® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander®, Brawler® and Sidekick® seats bring you lower to the ground than most other seats.

POSITION SEATS

Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.

TOURING SEATS

Designed for comfort, touring seats and passenger pillions offer a broad seating surface to reduce pressure points. The dished shape holds you in place and provides additional back support.

CUSTOM SEAT PROGRAM

A personalized seat is the perfect thread to tie your bike's attitude together. Select the stitching pattern, leather inlay and thread color that best support your custom movement, and you'll have your personalized seat in just three weeks. For more details, turn to page 728, or visit www.harley-davidson.eu/mydreamharley/customseat.

NOTE: Some Harley-Davidson seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

SUSPENSION

While most current Dyna® models are already equipped with low-profile suspension, Harley offers model-specific suspension options to lower non-current models.

HANDLEBARS

Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. The shape of the bar determines your reach to the hand controls and, therefore, your overall comfort.

FOOT CONTROLS

FORWARD CONTROLS

REDUCED REACH FORWARD CONTROLS

Where your feet contact the controls can often determine how many miles you can put on in a day. Mid-controls position your feet below the knee for a sporting riding posture, while forward controls stretch your legs for a relaxed, laid-back posture. The kit includes left and right footboards with inserts, footboard supports, brake lever, brake and shift linkage, brake pedal pad, and all required hardware. Installation reuses Original Equipment shift lever. Customize the look by adding your choice of accessory traditional D-shaped rider footboard inserts and large brake pedal pads.
